LinkedIn: Bilal Saeed
Location: Langora Meira, Baffa, District Mansehra, Pakistan

PROFESSIONAL SUMMARY

AI-focused BS student with hands-on experience from three internships across AI, AI automation and Python development. Skilled at building and deploying full-stack applications (Next.js, NestJS, Flask, Supabase) and LLM-powered automation workflows in n8n using Gemini and Mistral. Holds certifications in n8n automation and in AI and generative AI fundamentals, and delivers work that is well documented and ready to use. Seeking an AI or software internship or junior role to apply these skills to real-world problems.

EXPERIENCE

AI Automation Intern — *DaFi Labs / EmpRadar*

- Built an AI chatbot, "Cortex AI", with Next.js, Supabase authentication and an n8n workflow powered by Gemini with session memory and Gmail automation; deployed on Vercel.
- Delivered "Cortex AI 2.0", a full-stack AI assistant using NestJS, Next.js 14, Supabase and Mistral AI, with Swagger API docs, Sentry monitoring and Resend email; frontend on Vercel, backend on Railway.
- Designed n8n automations: an RSS-to-Gemini-to-image-generation content pipeline into Google Drive/Docs/Sheets, and a feedback-triage workflow with Gemini sentiment classification, Gmail alerts and Google Sheets logging.

Artificial Intelligence Intern — *CodeAlpha*

- Completed AI internship tasks, including a Language Translation Tool built with Flask and deep-translator, featuring language swap, clipboard copy and text-to-speech.

Python Development Intern — *Arch Technologies*

- Built a Flask To-Do List app (SQLite) with live countdown timers, deadline enforcement, PDF export via ReportLab and bulk-action UI.
- Developed a console Dice Rolling Game in Python with ASCII art and doubles detection.
- Prepared a complete internship report documenting the month's deliverables.

PROJECTS

Cortex AI Chatbot | cortex-chatbot.vercel.app
Tech: Next.js, Supabase, n8n, Gemini, Vercel

- Full-stack chatbot with SSR authentication middleware and an n8n AI-agent backend.

Cortex AI 2.0 | cortex-ai-2-0.vercel.app
Tech: NestJS, Next.js 14, Supabase, Mistral AI, Railway

- Production-style AI assistant with documented REST API, error monitoring and transactional email.

Agentic AI Python Programming Tutor
Tech: n8n, RAG, AI Agents, Python, Hugging Face embeddings

- AI-agent tutor for learning Python, using retrieval-augmented generation (RAG) with Hugging Face embeddings.

VaultPoint ATM Simulation
Tech: Flask, SQLite, OOP, HTML/CSS

- Secure ATM simulator with PIN lockout, daily withdrawal limits, atomic transfers, transaction history and printable receipts.

Hotel Booking System
Tech: Flask, Python, MySQL, HTML/CSS

- Hotel booking web application built with Flask and a MySQL database.

TECHNICAL SKILLS

Languages: Python, C++, SQL, JavaScript / TypeScript, Java (basic)
Frameworks: Flask, Next.js, NestJS
AI & Automation: n8n, LLM integration (Gemini, Mistral), RAG, AI agents, Hugging Face embeddings
Databases & Backend: MySQL, SQLite, Supabase, REST APIs
Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Vercel, Railway, Sentry
Soft Skills: Problem solving, teamwork, communication, time management

EDUCATION

BS Artificial Intelligence *2024 - 2028 (currently enrolled)*
Pak-Austria Fachhochschule: Institute of Applied Sciences and Technology, Mang, Haripur

CERTIFICATIONS

- **n8n: A Complete Guide to the Automation Tool** - Analytics Vidhya. Workflow automation, APIs, AI agents and integrations.
- **Introduction to AI Concepts** - Microsoft.
- **Introduction to Generative AI and Agents** - Microsoft.
- **Foundations: Data, Data, Everywhere** - Coursera (Google Data Analytics Professional Certificate). Data ecosystems, data-driven decision making, spreadsheets and analytical thinking.

SEMINARS & EVENTS

- **Summer Upskills Series** - participant; attended all 10 sessions and earned a certificate of completion.
- **IBM Dev Day: Bob in Action** - attended seminar.

LANGUAGES

English | Urdu
